Q13. How to add a QR code in the APP?	9
Q14. How to solve common problems on your own?	9

Q1. How to connect the watch to phone?

1. Download the **FitCloudPro** app from App Store or Google Play, or by scanning the QR Code below:

2. Keep Bluetooth on on your phone. Turn on the app **FitcloudPro**, click **Device** - **Bind Device** - **Search Now** to find the watch (**P133**) in the search list and click **P133** to complete the pairing- Click **Agree to the phone binding request** on watch, finally allow **Bluetooth Pairing Request**.

Note:

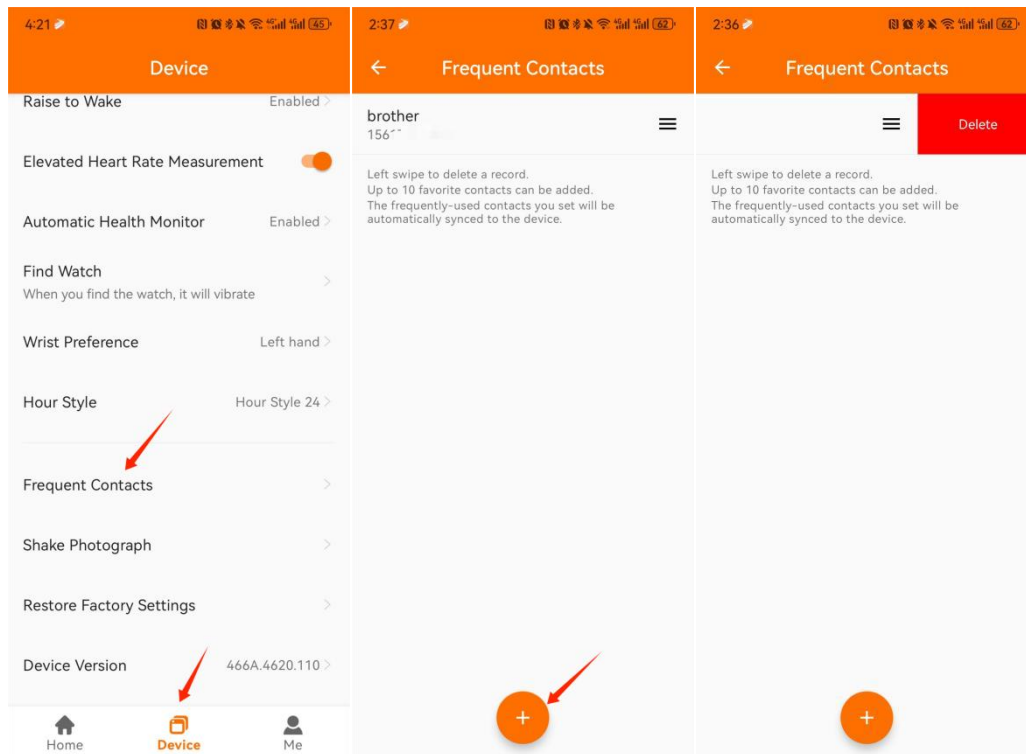

Do not connect directly to the watch via Bluetooth.

Compatibility: Android 6.0 and above / iOS 9.0 and above smartphones/ Bluetooth 4.0, not compatible with computers or tablets.

Q2. How to use Bluetooth calling function?

Ensure the watch and the app are connected via Bluetooth. Allow call notifications when connected.

1. Click **Device - Frequent contacts** - '+' to sync contacts in the app. Swipe the selected contact to the left to delete it.

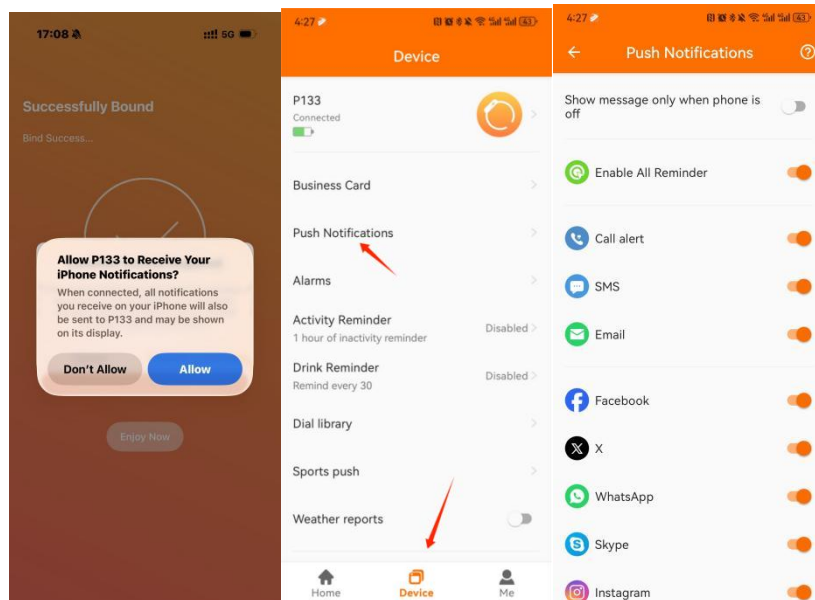

2. Press the side button to enter the watch menu, click **Dial**, choose from **Frequent contacts** or **Call records** to make calls on the watch.

Q3. How to receive message notifications?

Ensure the watch and the app are connected via Bluetooth.

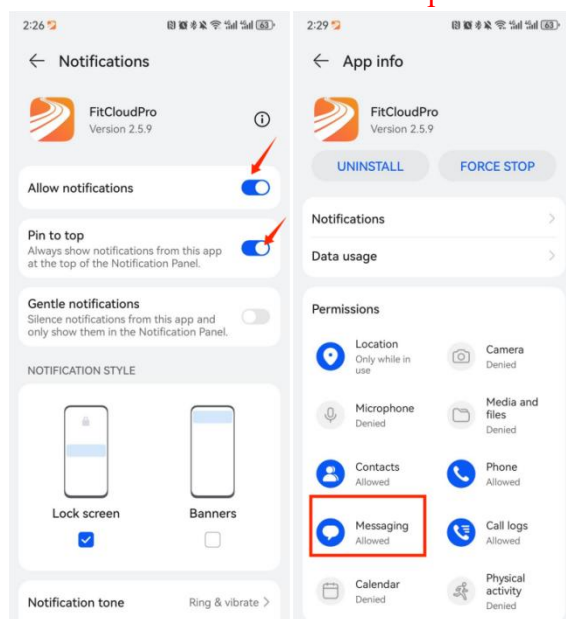

1. When connecting for the first time, if you have already allowed notification permissions , please open the app **FitCloudPro** - **Device** - **Push Notifications** - Turn on the app you want to receive notifications.

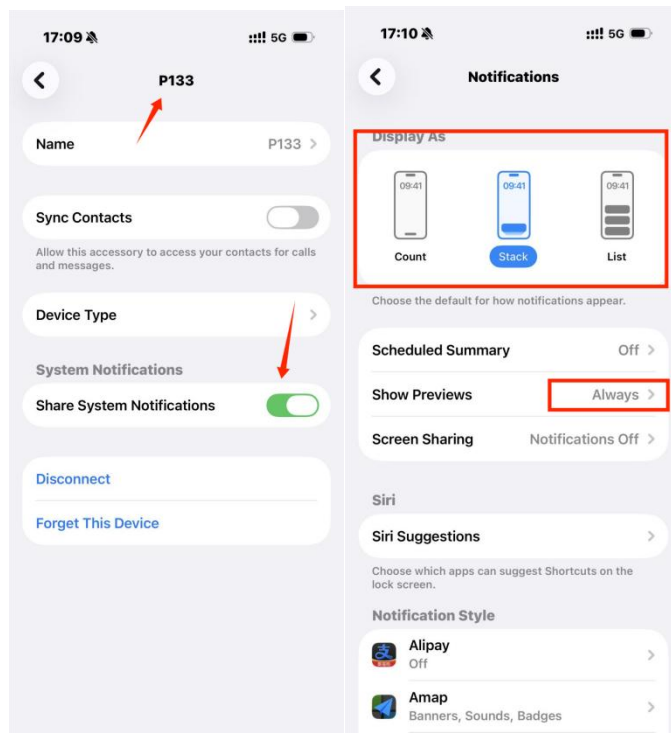

2. If you did not enable notification permissions when connecting, there are two settings available to receive messages:

(1) Reinstall the app, pair it with the watch, and ensure all notification permissions are allowed. Then open the app **FitCloudPro** - **Device** - **Push Notifications** - Turn on the app you want to receive notifications.

(2) For Android phone users, you need to allow notifications of the app firstly, turn on your phone **Settings**- **Apps & services**- **Apps**- **FitCloudPro**- **Notifications**- Turn on **Allow notifications** and **Pin to top**. And allow **Messaging** notifications.

For iPhone users, you need to turn on **Share System Notifications** in the Bluetooth firstly.

Then follow the steps below:

Click **Device- Push Notifications**- turn on the app you want to receive notifications.

Note:

1. *The watch only receives message displayed in the mobile phone message notification bar.*
2. *Keep the watch and mobile phone within 5meters.*
3. *Different phone models may have different settings.*

Q4. How to get accurate measurements of heart rate, Blood pressure and blood oxygen?

1. Wear it correctly — snug but not too tight, and on your non-dominant wrist.
2. Keep the sensors clean and dry.
3. Update the app and watch software regularly.
4. Enter your correct personal info (gender, age, height, weight) in the APP.
5. Keep your arm flat, relaxed, and still while it measures your heart rate or stress.

Note:

These measurements are estimates for daily trend reference and not for medical diagnosis.

Q5. How to get accurate sleep data?

1. Wear your watch properly — not too tight or too loose on your wrist.
2. Keep the watch fully charged before sleeping.
3. Enter your correct personal info (gender, age, height, weight) in the APP.
4. Sleep quietly without moving around too much (If you toss and turn too much during sleep, your watch may think you're awake).
5. Update your watch and app regularly.

Note:

Smartwatches can't track short afternoon naps.

Q6. How to play music on the watch?

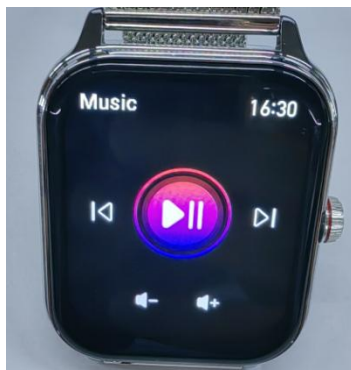

Ensure the watch and the app are connected via Bluetooth.

Press the button to wake the screen. Swipe down and tap the Phone icon. Turn on **Phone Audio** and **Media Audio**.

Press the button again to go to the main menu. Swipe up to open **Music** and press play.

You can switch tracks and adjust volume on the watch. To stop music on the watch, turn off **Media Audio**.

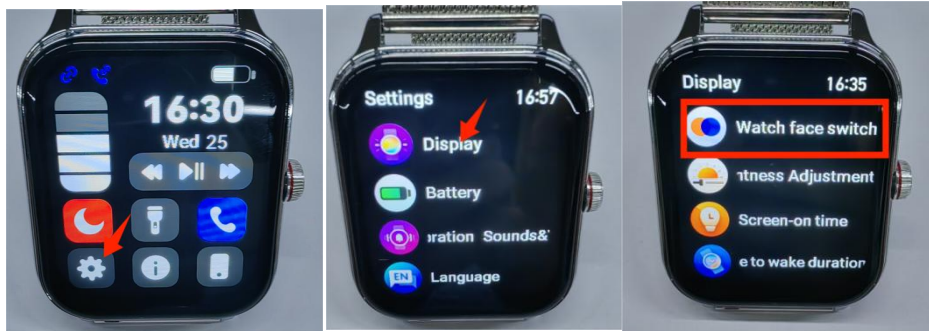

Note:

1. *Phone Audio must be on before turning on Media Audio.*
2. *To play music on the watch, open the music app on your phone first.*

Q7. How to switch watch faces?

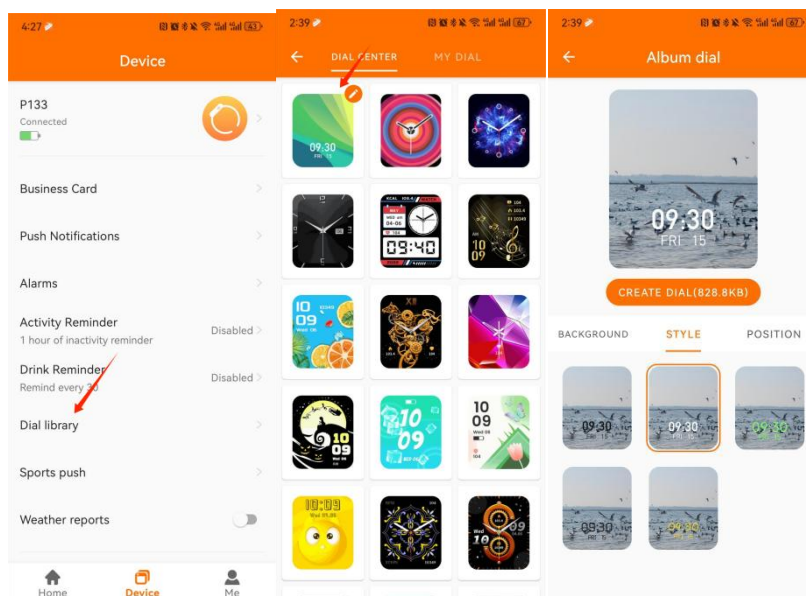

On the watch: You have 3 ways to change the watch face on watch.

1. Long-press the watch face interface. Once the watch vibrates and displays available watch faces, swipe the watch screen horizontally to locate your desired one.
2. You can also rotate the power button to switch between watch faces.
3. Press the button to wake the screen. Swipe down and tap Settings. Go to **Display** to switch watch faces.

On the APP: Click **Device** - **Dial library**. Choose your favorite face from the library. To customize: Click the first image in the **Dial Center**. Click '+' - Select a photo from your album or **Take Pictures**.

You can adjust the text **STYLE** and **POSITION**.

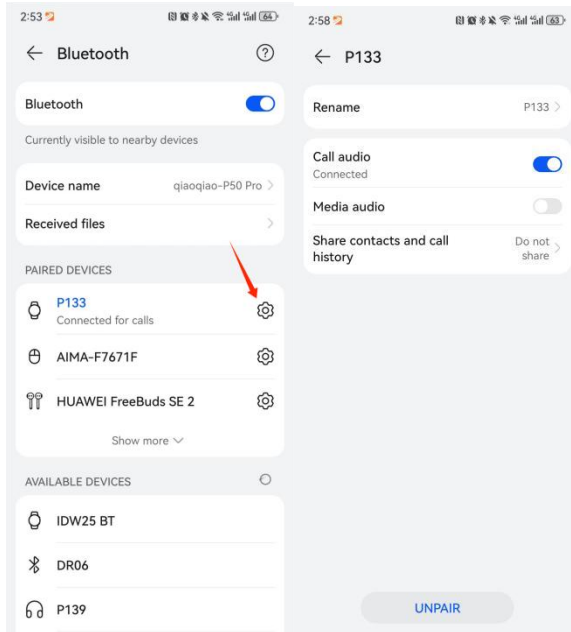

Q8. How to switch media audio?

On the watch: Press the button to wake the screen. Swipe down and tap the Phone icon. Turn off/on **Media Audio**.

On the APP: Turn on phone Bluetooth. Tap **Settings** next to your watch model. Turn off/on **Media Audio**.

Q9. How to reduce battery drain?

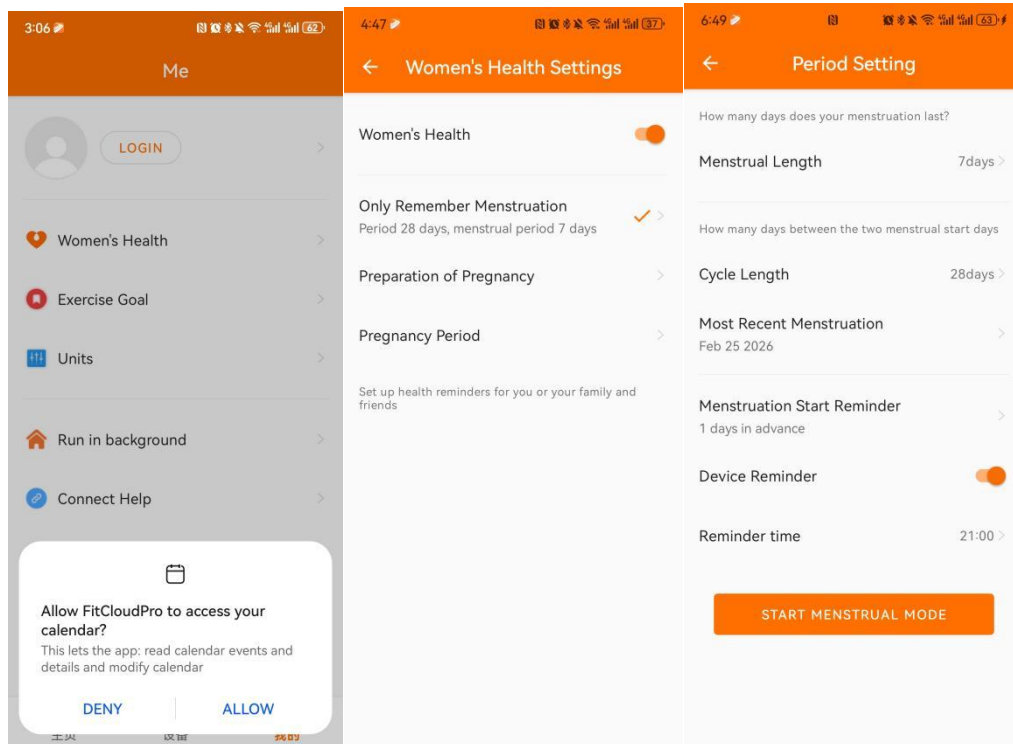

1. Lower screen brightness.
2. Turn off unused features, such as calls, notifications, and continuous monitoring.
3. Turn off Bluetooth when not in use.
4. Keep software updated for better battery optimization.
5. Enable power-saving mode: Turn on watch Settings- **Battery**- turn on **Power saving mode**.

Q10. How to use women's health functions?

Ensure the watch and the app are connected via Bluetooth.

Open the app, Click **Me- Women's Health**. Allow FitCloudPro to access your calendar. You can set the **Menstrual Length**, **Cycle Length**, **Most Recent Menstruation**, and the **Menstruation Start Reminder**.

Q11. How to switch languages?

Open watch settings, click **Language**- select your preferred language.

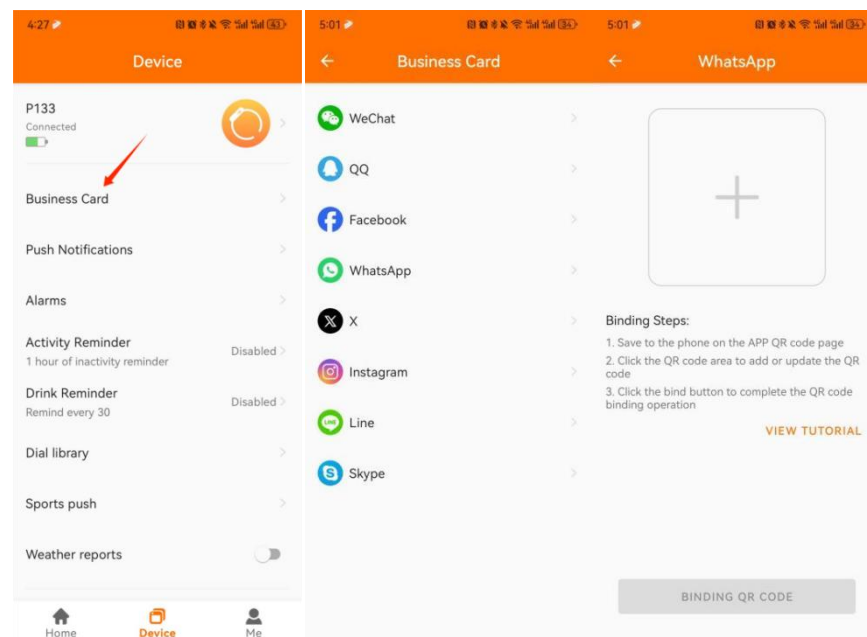

Q12. How to change the time?

On the watch: Open **Settings- Set Time**. You can set the **12/24-hour format**, **Time**, and **Date**.

On the APP: Click **Device- Hour Style**. Choose **12/24-hour** format or follow the system setting.

Q13. How to add a QR code in the APP?

Open the app, click **Device- Business Card**, and select the card you want to add.
When someone adds your contact info, open the watch's **Business Card** scanner to add it.

Q14. How to solve common problems on your own?

Open the app, click **Me- select FAQ**.
You can find solutions to common watch issues in the FAQ list.
